**Integrated
Services
Delivery Model**

Enterprise Networking

We see IP networks and networking as the key platform for your business functions and communication, which is a powerful point of differentiator for any business. Ask IT Enterprise Networking Solutions accelerate innovation to create more value for our clients.

Collaboration

The challenge bringing all your communications, messaging, collaboration, audio conferencing, video conferencing and enterprise social media tools together in a Unified Communications and Collaboration (UCC) solution that works in your environment.

Data Center

In order to turn data into business value, your data center needs to be a dynamic and agile asset: one that serves as a business response center that will scale to meet the growing demands of your organization and digital-first users. Ask IT Data Center solutions puts you in a position to create a next-generation, hybrid data center for the future and deliver business services that are more automated and responsive than ever.

Cloud Computing & Virtualization

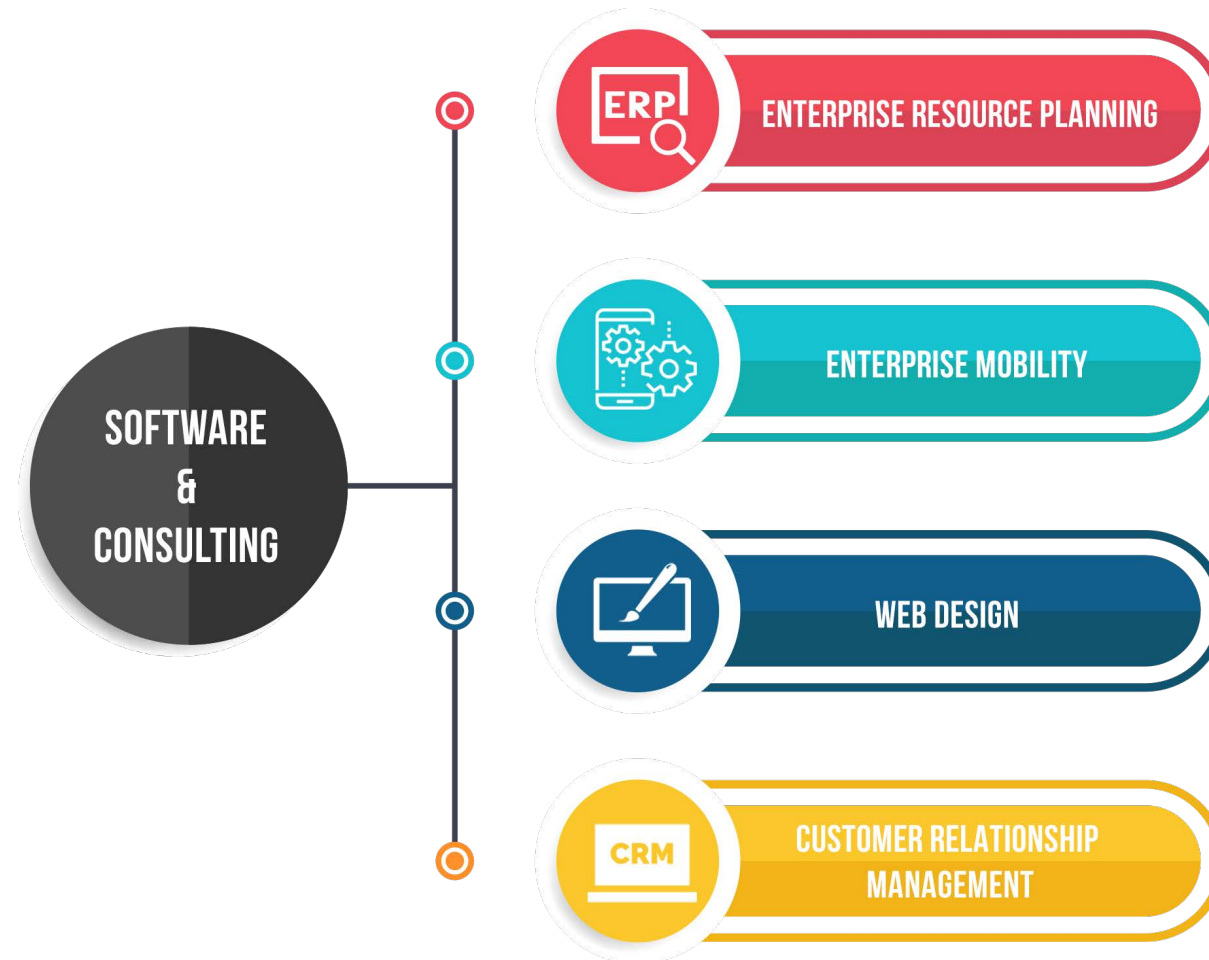

Virtualization is the key to unlocking cloud computing. Ask IT helps clients design, implement and manage 100% virtualized, cloud capable IT environments to seamlessly and securely increase organizational agility, propel business and IT initiatives and improve end user experience and performance.

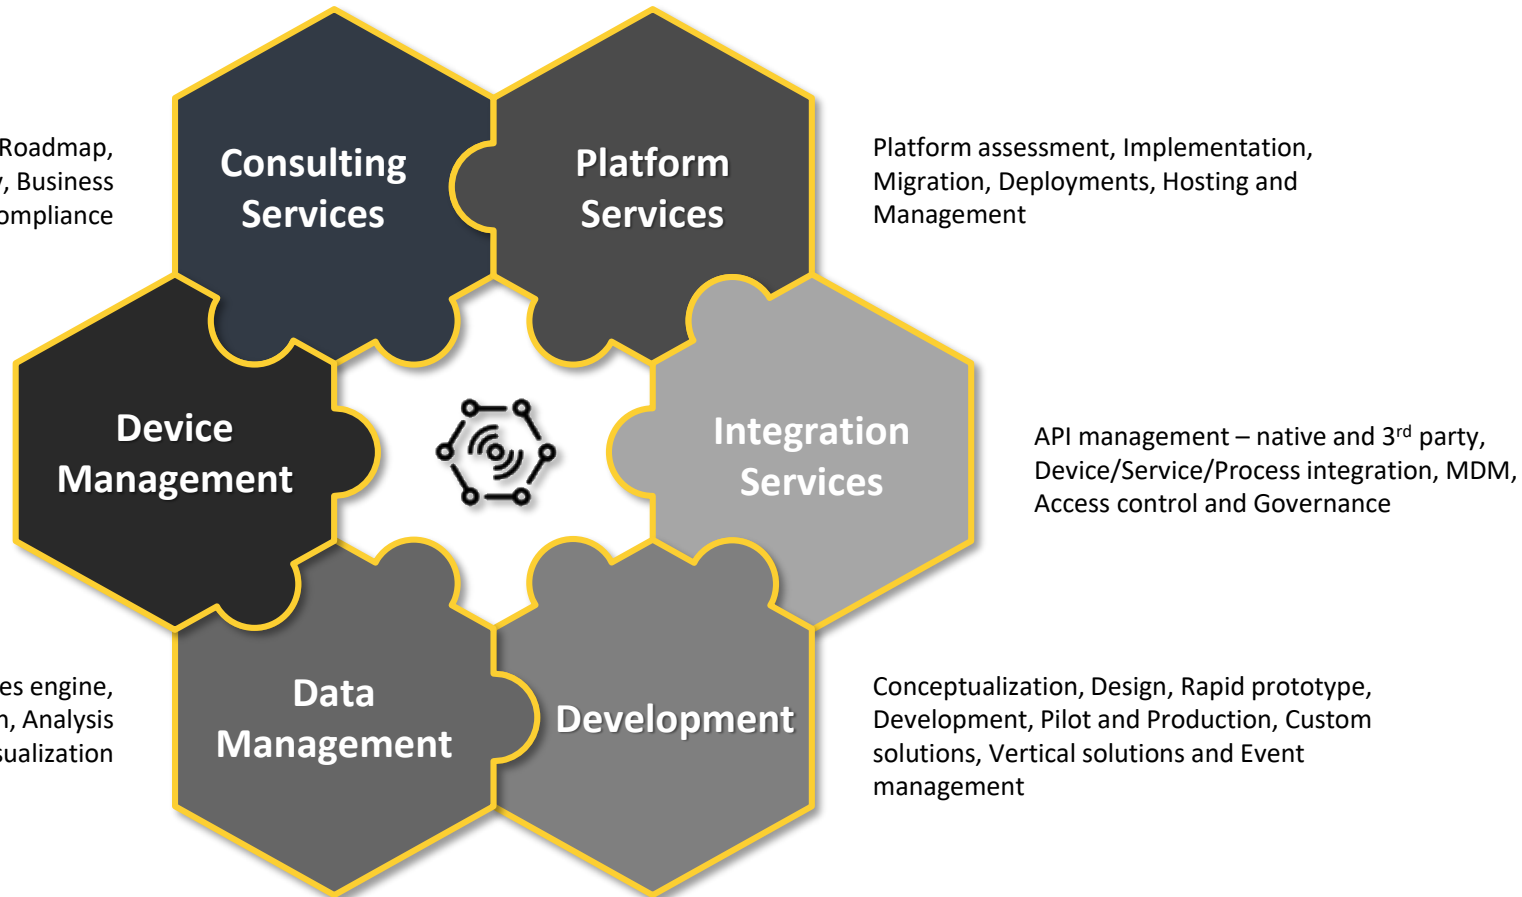

Information Security Services

We deliver Interconnected Security to support and defend the business and promote responsible information security behavior

Software & Consulting Services

Our Comprehensive solutions and services range across business functions including strategy level, solution evaluation and acquisition, requirements scoping, development and implementation, roll-out and user training, hand-holding support during go-live and ongoing. We use flexible technology, custom support and expert advice to help your business grow.

Internet of Things

We provide end-to-end connected solutions that deliver tangible business value for the customers.

**Enhanced Scalability empowered by
Enterprise Managed Services**

24/7 Enterprise Managed Services

Our Experience and expertise enables us to advise customers on system concept and design, provide detailed technical specifications, install and commission systems and provide ongoing maintenance where required. We have built up an in-depth knowledge of state of art security technology and this allows us to develop individually tailored security systems, no matter how unique the requirements.

ask IT support center aims at delivering the best of the support services to our customers to achieve the business objectives with prompt and time efficient response to their IT network issues. Our objective is to provide our best support services to all business sectors across the gulf region and across the world to achieve maximum customer satisfaction.
